The Sound Environment

Transparent has made an incremental improvement in their MM technology for their analogue interconnect and speaker cables. That change allows us to give our customers a great deal on all of our demo, stock and used interconnect and speaker cable. The sale prices range from 25% to in some cases more than 60% off the regular price. All are in perfect operating condition. Some demo cables may have scuffs on the network cases. All are guaranteed by us for 5 years against manufacturer defects. Music Link Plus and Music Wave Plus cables and above qualify for guaranteed upgrade pricing to higher level cables and MM2 technology. Reference cables and above can be updated to the new MM2 technology. Most cables are "MM" (Millennium) technology introduced by Transparent in 2005. Unequal lengths can be combined to make a pair. Because of the networks all lengths of Transparent cables sound the same.

Please See our Transparent Speaker Cable Sale List and our General Sale List for additional bargains. Both are accessible from the Sale List Page of our website.
